

Features Overview

THE SAME GREAT EVEREST SOFTWARE SOLUTION

Your business takes full advantage of the broad and rich functionality of the acclaimed Everest solution — accounting, e-commerce, Web self-service, purchasing, inventory, shipping/receiving, sales force automation, marketing, US payroll, and much more.

LOWER COST OF ENTRY

Everest On-Demand uses a low cost per-user-subscription model to deliver service without the large upfront license fees and hardware purchases that traditional On-Premise software requires.

NO LONG-TERM COMMITMENT

You can implement Everest On-Demand for your business without the lengthy commitments that On-Premise software usually requires.

CONVENIENT QUARTERLY BILLING OPTION

Pay as you go on a per-user basis.

IMMEDIATE DEPLOYMENT

You can achieve productive use of Everest On-Demand — with trained employees who know how to use the system — in record time.

INSTANT IT RESOURCES

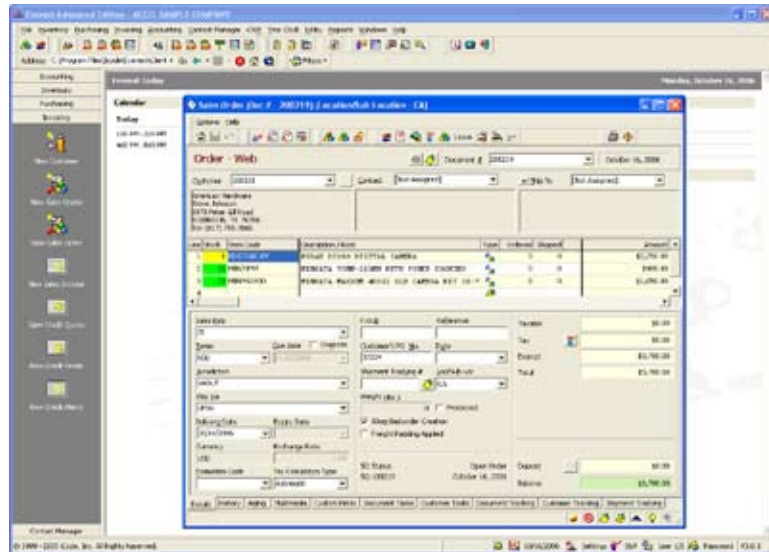

When you subscribe to Everest On-Demand, you immediately leverage a world-class IT infrastructure: hardware, software, networking, and expertise.

EXCELLENT SCALABILITY

Everest On-Demand easily grows with your business without presenting any limitations or barriers to slow you down.

Let Everest Software deploy, manage, and professionally maintain your Everest® implementation. With no software licenses or hardware infrastructure to buy, you enjoy a dramatically lower cost of entry and shorter time-to-productivity.

THE SAME GREAT EVEREST SOFTWARE SOLUTION

EXCELLENT SCALABILITY

WORLD-CLASS HOSTING FACILITIES

Everest On-Demand delivers its hosting services through Equinix, the world's largest network-neutral data center services company.

DEDICATED HOSTING MODEL

Everest devotes separate, dedicated hosting facilities to each customer—your deployment runs on its own server. There's no performance degradation or data risk that comes with inferior shared-hosting architectures.

COMPLETE DATA-PROTECTION, BACKUP, AND ARCHIVING

Everest can perform all appropriate backups and archiving to protect your critical data. Plus, you can subscribe to an optional service that provides you with regular backups of your data that you can access with an On-Premise copy of the software.

EXCELLENT SUPPORT FOR MOBILE USERS

Whether you're in the office, at home, or in a hotel room, Everest On-Demand presents the same interface, the same functionality, the same performance—with no compromises.

OPEN ACCESS TO YOUR DATA

You have full access and visibility to all fields for all of your data. Plus, you can integrate the third-party tools you choose with your Everest implementation—reporting, inventory, shipping, payroll, EDI, and more.

A ROBUST WINDOWS INTERFACE

Everest On-Demand is the hosted application service that doesn't use the lowest-common-denominator Web interface and require slow mouse-driven navigation. It uses a full Windows interface with hot-keys, fast screen-to-screen switching, and better features for trained users.

FULL CUSTOMIZATION

Unlike shared implementations, Everest On-Demand lets you fully customize your deployment with your choice of on-premise hardware peripherals (like printers and scanners).

EASY CONVERSION TO ON-PREMISE DEPLOYMENT

Any time you like, you can easily and quickly convert to an On-Premise deployment for greater control and lower total cost of ownership.

WORLD-CLASS HOSTING FACILITIES

About Everest Software, Inc.

Everest Software empowers companies to view and manage every function of their business more effectively. The company's fully integrated business management software solution, Everest, addresses the unique needs of growing small- to medium-sized businesses (SMBs) in the wholesale/distribution and retail industries by allowing them to quickly manage and track their business operations online and offline; from storefront to the front and back office. Everest Software is committed to providing customers with the service, support and expertise they require to increase efficiency and profitability with a solution that provides an unmatched rapid return on investment. Everest Software is the proud winner of numerous awards including the SIIA Codie Award for 'Best Business Software Product.'
